## RECYC-QUÉBEC FLW Survey – Egg Producer

## Introduction

RECYC-QUÉBEC and the City of Montreal have commissioned Value Chain Management International to estimate the volume of food loss and waste (FLW) occurring in the province of Quebec from a whole of chain perspective, then extrapolate the findings in terms of greenhouse gas (CO2E) emissions.

As an expert industry stakeholder, we would greatly appreciate your completing a survey that we have designed to enable us to estimate loss factors in specific sectors and food types. The information that you provide is completely confidential. Only aggregated results at an industry level will be reported. No individuals or organizations will be identified at any stage of the analysis and reporting.

In completing the survey, please respond in terms of a typical year.

Please complete the survey by Thursday, April 15.

If you have any questions about the survey and overall study, please contact Dr. Martin Gooch (martin@vcm-international.com) or Mariane Maltais Guilbault m.maltais@recyc-quebec.gouv.qc.ca.

RECYC-QUEBEC	C FLW Survey – Egg Producer
Unavoidable and Un	planned Losses
Each type of loss is d	escribed below.
A. Unavoidable losse treated with antibiotic	s are inevitable – perhaps due to eggs having to be withheld due to birds being es.
=	are typically caused by supply, internal operations, or market related factors. pility to sell products due to having reached your quota limit.
6. In <b>dozens of eggs</b> , each year? <b>Please en</b>	what quantity of <b>unavoidable</b> and <b>unplanned</b> loss does your operation experience <b>ter numbers only.</b>
Unavoidable loss	
Unplanned loss	
7. Indicate whether the	quantities that you provided above were measured or are estimated.  Measured / Estimated
Unavoidable loss	
Unplanned loss	
8. Identify if your organ	ization is actively working to reduce its unavoidable or unplanned losses.
	Yes / No
Unavoidable loss	
Unplanned loss	

	C FLW Survey – Egg Producer	
Loss Management		
•	ntage (%) of <b>unavoidable</b> and <b>unplanned</b> ng into foods or nutritional supplements. <b>(F</b>	d loss that would be edible, either in its present Please enter numbers only.)
Unavoidable loss		
Unplanned loss		
	below the top three destinations of the <b>u</b> dicate the percentage that is directed to e	navoidable and unplanned losses that you each of the three destinations.
	Percentage of unavoidable loss	Percentage of unplanned loss
Rescue/redistribution for human consumption		
Upcycling into foods, nutritional supplements, etc.		
Animal feed		
Biomaterial processing/rendering		
Biomethanisation (anaerobic digestion)		
Compost		
Land application		
Incineration or controlled combustion		
Landfill/burial		
Other (e.g. sewer)		
11. Does your orga  Yes  No	nization monitor the CO2 emissions assoc	ciated with food loss and waste?

## Causes of Losses

14. On a scale of 1 to 5, please rate the impact of each factor listed below on the unavoidable losses that you
experience? (1 = minor impact; 3 = moderate impact; 5 = significant impact). Please ignore any causal factor
that is irrelevant.

	1	2	3	4	5
Inaccurate forecasts					
Changes to customer orders		$\bigcirc$			$\bigcirc$
Customer (over) specifications
